# Aluminium French Doors

Aluminium French Doors create a visually stunning addition to your home and can add significant value to the property. They are designed to seamlessly match our Bifold Door system, sharing the same components. Class-leading design features set them apart from any competition, with excellent thermal performance and slim profile sections being key to their sleek design.

Engineering-grade hardware allows for silky smooth opening and closing operation, without the premium price. As well as being PAS24 compliant, they exceed new build regulations, with U-values as low as 1.2 W/m$^2$k.

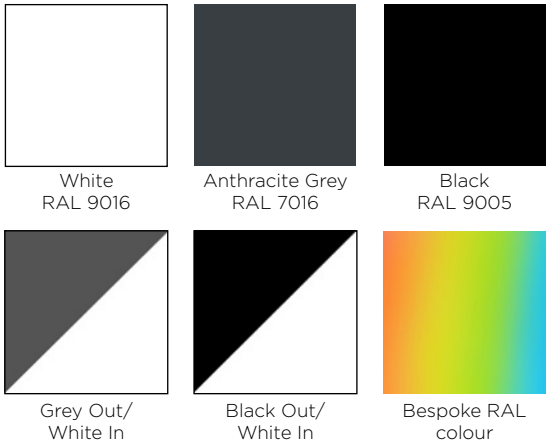
## WHY CHOOSE ALUMINIUM?

- Aluminium is extremely durable and more hard-wearing than other materials on the market. You'll be able to enjoy your aluminium doors for decades to come due to their high resistance to the elements.
- It is also an incredibly strong material, providing a high level of security and impact resistance.
- Aluminium doors are among the best-insulated on the market thanks to advanced thermal break technology, which prevents cold transfer.
- They also require very little maintenance to ensure optimal performance and a fresh appearance.

## COLOURS

Our doors are available in three standard colours, plus two dual colour options.

For projects requiring bespoke coloured doors, any RAL colour can be also be available upon request.



## PRE-GASKETED EASY-TO-USE CLIP IN BEAD

- Quicker installations - simply clicks in, saving lots of time!
- Easy-to-use and to remove
- Provides slimmer sightlines & better aesthetics
- Pre-gasketed design

## GLAZING OPTIONS

Our French Doors can be finished in several glazing options to create a style to suit any property, including:

- Double glazed
- Triple glazed
- Integral blinds
- Heritage look astragal bars
- Solid panel inserts

## Maximum Vision

Our French Door system gives one of the largest sash sizes available, with up to 1200mm width and 3000mm height per pane - maximum weight per sash 120kg. Paired with super-slim sightlines, you'll get the best uninterrupted views with our doors.

## Thermal Efficiency

Our French Doors can achieve U-values as low as 1.2 W/m$^2$k, when combined with highly energy efficient glass - keeping your home warm and comfortable all year round.

## Low Maintenance

Our Aluminium French Doors are known for their low maintenance upkeep and high durability. Unlike timber, they don't need painting or staining to keep them weather-proof and they won't rust or corrode. They will also never rot, peel or flake.

## Weather Resistance

Excellent weather sealing is achieved using specially designed perimeter seals, with the option of weather piles for lower thresholds. Weather-tightness is tested to British standards.

Our Low Threshold (20mm) is not weather rated but creates a more seamless look and comes in a silver anodised finish.
